EDUCATION

University of Engineering and Technology Taxila

Bachelor of Science in Software Engineering

Taxila

Aug. 2023 – May 2027

ILM College For Boys

Fsc. Pre Engineering

Sargodha

Aug. 2021 – May 2023

EXPERIENCE

Machine Learning Engineer for Lumin Solutions

Lumin Solutions Rawalpindi

Oct. 2025 – Jan. 2026

Rawalpindi

- Worked as a Machine Learning Engineer for Lumin Solutions to help them create AI Video Dubber System

Artificial Intelligence Assistant

FAST University Islamabad

Aug. 2025 – Oct. 2025

Islamabad

- Explored methods and helped to create an advanced AI Agent Game that will learn and get better over time for students in FAST University Islamabad

Front End Developer for SoftDesk

UET Taxila

May 2025 – Aug 2025

Taxila

- Helped in Developing the Website for SoftDesk UET Taxila as a Front-End Developer

PROJECTS

NOVA AI aka. Jarvis AI | Python

July. 2024

- Developed NOVA AI, an intelligent AI agent supporting both voice commands and CLI interaction.
- Automated tasks including WhatsApp messaging, email sending, web searching, news/weather retrieval, and multimedia playback.
- Enabled PC control through voice commands, including file management, application launching, and personalized memory capabilities.

School Management System | Python, Pyqt6

May. 2025

- Developed a Production Level School Management System currently running in 5+ Schools in Sargodha and Rawalpindi
- The System has 2 types of Licensing. One is Monthly Based and the other is Lifetime, both licenses I coded myself
- It also uses Artificial Intelligence to create a conflict free Timetable schedule and provide suggestions

Point Of Sales (POS) | Python

Nov. 2025

- Developed a Production Level POS System currently running in 2+ Shops
- The System has 2 types of Licensing. One is Monthly Based and the other is Lifetime, both licenses I coded myself
- It also uses advanced plotting techniques and graphs to analyze sales, inventory tracking and revenue.

Pharmacy Software | Python

Feb. 2025

- Developed a Production Level Medical Store System for a client, now 2+ Stores using this system
- The System has 2 types of Licensing. One is Monthly Based and the other is Lifetime, both licenses I coded myself
- It also uses advanced plotting techniques and graphs to analyze sales, inventory tracking and revenue.

RAG System | Python

Feb. 2025

- Built a complete RAG system with Qdrant vector database, BAAI/bge-small-en-v1.5 embeddings, HyDE routing, and LongCat-Flash-Chat-2602-Exp generation to power an enterprise knowledge base.
- Ingested 15+ KIS knowledge articles into semantic search (CSV + document chunking) and implemented a production-ready pipeline that routes queries intelligently and cites exact sources.
- Delivered a secure, LLM-powered assistant for employee IT support (VPN, email, printer troubleshooting, PIN reset, etc.) with 100% database-only responses and <1% hallucination rate.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, PyTorch, TensorFlow, Flask, Junit, FastAPI, PyQt

Developer Tools: Google Cloud Platform, Azure, VS Code, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib, Scipy, Scikit-learn

Other Skills: Project Management, MLOps, Attention to detail

Certifications

Data Science Specialization: IBM through Coursera (12 Months)

Machine Learning Specialization: DeepLearning.ai (3 months)

Deep Learning Specialization: DeepLearning.ai (4 months)

MLOps: Duke University through Coursera (4 months)

Project Management: Google through Coursera (3 months)

Cloud Engineering: Duke University through Coursera (3 months)
